

Written Consent — Acceptance of a Project into the Work Pool

Timeless Way Interactive, LLC — a Texas limited liability company (the "Company")

Project: *Delta x Dungeon Breaker*

Action by written consent, taken under:

☒ **the Preamble** of the Operating Agreement — the Company has a single Member, and every decision reserved to the Committee, to a Majority, or to a Supermajority is made by the Founding Member in writing and kept with the Company's records.

☐ ~~Sections 5.2 and 5.3(3) of the Operating Agreement — the Company has two or more Members.~~ (Not applicable.)

Date: _____ (the "Consent Date")

Recitals

A. _____ (the "Contributing Member") is a Member of the Company, and is its sole Member and Founding Member.

B. The Contributing Member has created, and owns individually, the project known as **Delta x Dungeon Breaker** (also styled *Dungeon Break*), together with its source code, engine fork, project files, source art assets, design documentation, build and packaging tooling, and associated names and marks (collectively, the "Project"), as described in Schedule 1.

C. Section 7.2 of the Operating Agreement provides that a Member may, at their sole discretion, contribute a project they have created into the Work Pool; that the project enters the Work Pool only on the contributing Member's voluntary act **and** the Committee's acceptance under Section 5.3(3); that the Committee accepts a project only after the contributing Member discloses every third-party, marketplace, open-source, and AI-generated component in it together with the license terms for each; and that the disclosure goes into the manifest maintained under Section 10.1.

D. The Contributing Member has voluntarily offered the Project to the Company and has delivered the disclosure required by Section 7.2, attached as **Schedule 2** and recorded in the IP Manifest.

Consent and Resolutions

The undersigned, being the sole Member of the Company, hereby consents to and adopts the following, exercising the Committee's authority under the Preamble:

1. Voluntary contribution acknowledged. The Contributing Member's offer of the Project to the Work Pool is voluntary, made under Section 7.2 at the Contributing Member's sole discretion, and is not required by any provision of the Operating Agreement, by any Company policy, or as a condition of membership.

2. Disclosure received and found sufficient. The disclosure attached as Schedule 2 identifies every third-party, marketplace, open-source, and AI-generated component known to the Contributing Member to be present in the Project, and the license terms each is held on. Acceptance under Section 7.2 is made on the strength of that disclosure.

3. Representations of the Contributing Member. The Contributing Member represents, as required by Section 7.2, that they own the Project; that it carries no security interest and no third-party claim; and that the disclosure in Schedule 2 is complete and accurate to their knowledge as of the Consent Date. The Contributing Member further represents that no part of the Project is encumbered by a contributor's retained rights (Section 3.7) and that the Project is not, and has never been, pledged, mortgaged, or offered as collateral for any obligation (Section 9.4).

4. Acceptance into the Work Pool. The Project, as described in Schedule 1, is **accepted into the Work Pool** under Sections 5.3(3) and 7.2, effective on the Consent Date.

5. Transfer of ownership. On acceptance, all intellectual property in the Project transfers to the Company and becomes Company IP held in trust for the equal benefit of all Members (Sections 7.1, 7.2). The Contributing Member makes a present assignment of that intellectual property to the Company by the separate Work Pool Contribution and Assignment executed alongside this Consent, and will execute any further documents reasonably needed to perfect or record the Company's ownership, including any assignment recordable with the United States Copyright Office or the United States Patent and Trademark Office.

6. Irreversibility acknowledged. Contribution is irreversible. Once in the Work Pool, the Project is Company IP and is governed by Article 7. The Contributing Member does not retain an ownership interest in it and holds instead the perpetual license of Section 7.3, on the same terms as every other Member.

7. License consequences. The Project is Company IP for all purposes of Section 7.3 from the Consent Date forward. Every Member's perpetual license refreshes to cover it, and every Member's delivery right under clause 7 of Section 7.3 — repositories with history intact, project files, and source assets in their working formats, each delivery carrying its manifest — attaches to it. Components held on third-party terms that do not permit a Member's Section 7.3 use are

identified as such in the manifest; the Company's acceptance does not, and cannot, enlarge those terms.

8. Records. The Secretary shall (a) enter the Project on the Work Pool list in the Member Register, (b) record the Schedule 2 disclosure in the IP Manifest under Section 10.1, noting for each component whether its terms permit a Member's Section 7.3 use, and (c) keep this Consent and the executed assignment with the Company's records.

Schedule 1 — The Project

The Project consists of the following, in each case including its full version-control history, branches, tags, and large-file storage:

#	Component	Location	Notes
1	Game project (Unreal project, C++ modules, content, config, build tooling)	github.com/Timeless-Way-Interactive/Dungeon-Break-Game	Branch development and all others
2	NarrativeEngine plugin	github.com/CStampGamesLLC/NarrativeEngine (submodule of item 1)	To be moved to the Company's GitHub organization; IP Manifest row 5
3	Engine fork	github.com/Timeless-Way-Interactive/DungeonBreakerEngine	Branch ue6-main. Only the Company's own changes are contributed; Epic's code stays on the Unreal Engine EULA (IP Manifest row 1)
4	Source art assets (Blender files, Substance projects, capsule art, fonts, concepts)	github.com/Timeless-Way-Interactive/Dungeon-Breaker-Art-Assets	Branch main
5	Superproject, launcher and setup scripts, devlog, design documents	github.com/Timeless-Way-Interactive/Delta-x-Dungeon-Breaker	Binds items 1, 3, and 4 as submodules
6	Names and marks: "Delta x Dungeon Breaker", "Dungeon Break", associated logos and capsule art	—	Registered or pending applications: _____
7	Accounts and listings: itch.io channel CStampGames/dungeon-break; domain cstampsoftworks.com; store pages, Patreon, socials: _____	—	Transfer of account control is administrative, not IP; list what moves

Excluded from this contribution: the Business-Organization submodule of item 5, which holds the Company's own records and is not part of the Project; and _____
(write "nothing else" if nothing else is excluded. Anything not listed here is contributed in full.)

Note on repository custody. Items 1, 3, 4, and 5 already sit in a GitHub organization bearing the Company's name; item 2 does not yet. Custody of a repository is not a transfer of copyright

either way: the assignment executed under Resolution 5 is what moves ownership, and this Schedule identifies what it moves.

Schedule 2 — Section 7.2 Disclosure

The disclosure is the *Delta x Dungeon Breaker* section of the IP Manifest as it stands on the Consent Date — rows 1 through 21 and its open items — printed and attached to this Consent as the Attachment below. From that date the manifest is the living record and this Schedule is the snapshot.

In summary, as of the survey of 2026-09-11:

- **Company IP, contributed in full:** the game code and content, NarrativeEngine, the Company's engine changes, and original art (rows 5, 8, 20); AI-assisted code, held on Anthropic and OpenAI terms that assign output to the user (row 9); and the Yar concept art, held under a written assignment (row 19).
 - **Held on third-party terms a Member can obtain for themselves:** Unreal Engine and Epic content (rows 1–3), MetaHumans (row 4), Mixamo (row 14), and permissively licensed code, fonts, and assets (rows 6, 7, 12, 16, 18).
 - **Licensed to the Contributing Member personally** — usable in this Project, not in a Member's own work: the Fab packs, Megascans, and REXARD icon packs (rows 10, 11, 13).
 - **Not cleared for commercial release:** the Dumbledor font (row 17) and the unidentified music track (row 15).
-

Signature

Executed as of the date first written above.

Signature of Founding Member

Printed name: _____ Date: _____

Signing in two capacities: as the Contributing Member offering the Project under Section 7.2 and giving the representations in Resolution 3, and as the sole Member exercising the Committee's acceptance under the Preamble.

Attachment — IP Manifest, *Delta x Dungeon Breaker* section

Accepted into the Work Pool: _____ (*pending*)

Disclosure source: survey of the Contributing Member and inspection of the game, engine, art, and superproject repositories, 2026-09-11

Contributors: the Contributing Member is the only author in every repository's history (all commit identities, including "Not Clayton", are the Contributing Member); the only outside work is the concept art in row 19.

Scope — what the Project comprises

Each item includes its full version-control history, branches, tags, and large-file storage.

#	Component	Location	Notes
1	Game project (Unreal project, C++ modules, content, config, build tooling)	github.com/Timeless-Way-Interactive/Dungeon-Break-Game	Branch development and all others
2	NarrativeEngine plugin	github.com/CStampGamesLLC/NarrativeEngine (submodule of item 1)	To be moved to the Company's GitHub organization; row 5 below
3	Engine fork	github.com/Timeless-Way-Interactive/DungeonBreakerEngine	Branch ue6-main. Only the Company's own changes are contributed; Epic's code stays on the Unreal Engine EULA (row 1 below)
4	Source art assets (Blender files, Substance projects, capsule art, fonts, concepts)	github.com/Timeless-Way-Interactive/Dungeon-Breaker-Art-Assets	Branch main
5	Superproject, launcher and setup scripts, devlog, design documents	github.com/Timeless-Way-Interactive/Delta-x-Dungeon-Breaker	Binds items 1, 3, and 4 as submodules
6	Names and marks: "Delta x Dungeon Breaker", "Dungeon Break", associated logos and capsule art	—	Registered or pending applications: _____
7	Accounts and listings: itch.io channel CstampGames/dungeon-break; domain cstampsoftworks.com (the Homepage and SupportContact URLs in Config/DefaultGame.ini); store pages, Patreon, socials: _____	—	Transfer of account control is administrative, not IP; list what moves

Excluded: the Business-Organization submodule of item 5, which holds the Company's own records and is not part of the Project; and _____ (*write "nothing else" if nothing else is excluded*).

Items 1, 3, 4, and 5 already sit in a GitHub organization bearing the Company's name; item 2 does not yet (open item 6).

Engine and Epic content

#	Component	Held on	§ 7.3?	Notes
1	Unreal Engine source fork, branch ue6-main (Timeless-Way-Interactive/DungeonBreakerEngine)	Unreal Engine EULA (Epic Games)	No	Each Member licenses Unreal from Epic in their own name; the Company cannot pass it through. The fork is almost entirely Epic's upstream history. The Company's own changes (one commit, 2026-08-23) are Company IP, usable by any Member who holds an Unreal license.
2	Epic first-party plugins enabled by the project: ModelingToolsEditorMode, LiveLink, GameplayAbilities, StateTree, GameplayStateTree, SmartObjects, MetaHumanCharacter, ModelViewViewModel, GizmoFramework, AutomatedPerfTesting, DaySequence, ModelContextProtocol (Experimental)	Unreal Engine EULA	No	Same route as row 1
3	Epic sample content: StarterContent; the EpicGamesFog folder bundled inside CartoonWaterShader; WorldGridMaterial textures baked into the orc marketing thumbnail	Unreal Engine EULA	No	Consider replacing StarterContent before release
4	MetaHuman content (Content/MetaHumans) and MetaHuman textures used in the orc marketing thumbnail (SourceAssets/Marketing/OrcBody, OrcHead)	MetaHuman license, part of the Unreal Engine license	Yes	Since June 2025, MetaHumans may be used in any engine or DCC tool, commercially — free under \$1M revenue, standard Unreal terms above. Each Member uses them under their own Unreal/MetaHuman license.

Code and plugins

#	Component	Held on	§ 7.3?	Notes
5	Plugins/NarrativeEngine	Company IP , contributed with the Project; published outbound under MIT with the Company as copyright holder	Yes	Created by the Contributing Member in January 2025 under an old "Cstamp Games, LLC" notice; that entity was inactive and never held the work. Notice corrected to the Company 2026-09-11. The repository still sits in the CStampGame sLLC GitHub org — see open item 6.
6	Plugins/ImGui — UnrealImGui 1.22 (Sebastian Gross), bundling Dear ImGui (Omar Cornut)	MIT (both)	Yes	Keep both license notices with any copy
7	Plugins/UEGitPlugin — Git LFS 2, v3.16 (Project Borealis; Sébastien Rombauts), bundling git-lfs binaries	MIT; git-lfs is MIT	Yes	Editor tooling only; not shipped

#	Component	Held on	§ 7.3?	Notes
8	Game C++ modules (Combat, Narrative, Economy, DungeonBreak, HUD, GlobalHelpers, Tools, Automation, DungeonBreakAdmin), Blueprints, and content under Content/DungeonBreak	Company IP , contributed with the Project	Yes	Original work of the Contributing Member. 45 files carried an erroneous "Copyright CStamp Games, LLC" header; corrected to the Company 2026-09-11.
9	AI-generated code — Claude / Claude Code (the large majority), ChatGPT / Codex	Anthropic and OpenAI terms, both of which assign output rights to the user	Yes	No third-party restriction on use. Portions generated with no meaningful human authorship may not be copyrightable under current U.S. Copyright Office guidance; human-written, human-edited, and human-arranged code is. No AI-generated art, text, audio, or 3D is in the Project.

Marketplace and library assets

#	Component	Held on	§ 7.3?	Notes
10	Fab / Unreal Marketplace packs: AdvancedMagicFX13, AlchemistsHouse, CartoonWaterShader, RPGEffects, StylizedProvençal, cplomedia_ModularNatureAtmo (nature ambience audio)	Fab Standard License — mostly Professional tier, some Personal; pre-Fab purchases may remain on the legacy UE Marketplace license	Conditional	Licensee is the Contributing Member personally (personal Epic account). Fab lets a licensee share assets with collaborators working on the same project, so other Members may use them <i>in this Project</i> . They may not take them into their own work — each buys their own license. See open item 3.
11	Fab / Quixel Megascans (Content/Fab/Megascans, acquired March 2026)	Fab Standard License	Conditional	Same as row 10
12	Content/Fab/CC0_-_Wooden_Arrrow	CC0 1.0 (public domain dedication)	Yes	No conditions
13	REXARD icon and UI packs from the Humble Fantasy Game Dev Bundle (Feb 2019), downloaded directly from Humble: characteravataricons, fairytaleiconsmegapack, fantasyiconsmegapack, guimegapack, rpbclassbadges, rpgweaponsicons, spellbookmegapack	Reported as the GameDev Market Pro Licence — perpetual, royalty-free, commercial use in any number of products; no redistribution except as part of a finished product	Conditional	Licensee is the Contributing Member personally. The downloads contain no license file; confirm the terms on the Humble purchase page. No Member may redistribute the raw icons, and a Member's own project needs its own license. See open item 3.
14	Mixamo character Ch36 and animations (Content/Mixamo); Mixamo X Bot geometry underlying the PINOC hand-cursor rig	Adobe Mixamo terms — royalty-free for commercial use; no redistribution as standalone assets	Yes	Any Member can get the same assets free under their own Adobe ID. Never ship or hand over raw Mixamo files outside a project. The PINOC rig, retargeters, and HandIntroAnimation are original work (Blender) built on that mesh.

#	Component	Held on	§ 7.3?	Notes
15	Music: 00_SW_StartingZoneAmbient — imported October 2025 from "Cute keyboard video game thing.wav"	A royalty-free library; source not recorded	Unknown	Must be identified or replaced before release. See open item 2.

Fonts

#	Component	Held on	§ 7.3?	Notes
16	Cardinal / Cardinal Alternate — © Typographer Mediengestaltung 2000, full character set by Dieter Steffmann	Freeware; distributors list it as free for commercial use	Yes	No license file in the repository — save a copy of the license statement with the records (open item 5)
17	Dumbledore 1–3, all variants — GemFonts (G. Meade), 2001	GemFonts conditions of use (SourceAssets/Fonts/dumbledore/gemfont.txt): free only where no fee is charged; may not be included in any commercial product without the author's permission	No	Blocked for commercial release. Written permission is being sought from the author (open item 1); replace the font if it isn't granted.
18	VTC Goblin Hand — VTC Vigilante Typeface Corporation (WolfBainX), 1999	"Distro-Ware" (VTCinfo.txt): any use except reselling the typeface	Yes	Keep VTCinfo.txt with the font

Art and tools

#	Component	Held on	§ 7.3?	Notes
19	Yar building concept (SourceAssets/Concepts/Yar_Building_Architecture.png) — by _____	Written agreement dated _____ assigning copyright	Yes	Reference only; not shipped. File the agreement with the Company's records (open item 4).
20	Original art in SourceAssets: capsule art, logo, cursor hand, HandIntroAnimation, storyboard .blend files	Company IP , contributed with the Project	Yes	Made in Blender
21	Adobe Substance 3D Painter project files (logo, sword, orc thumbnail .spp)	Adobe terms. Output belongs to the user; any Substance library materials used are held on Adobe's asset terms	Yes	A Member needs their own Substance license to open the .spp files; the exported textures are usable without one

Open items before signing

Signing the acceptance is a representation that this section is complete (Resolution 3). These items don't block acceptance, but the first three block **commercial release** of the game until they're resolved.

1. **Dumbledore (row 17).** Get written permission from G. Meade / GemFonts, or replace the font. The contact addresses in `gemfont.txt` date from 2001 and may be dead; if no one answers, replace it.
2. **Music (row 15).** Find the source — searching the major royalty-free libraries for the original file name is the fastest route — record the license here, or replace the track.
3. **Personal-account licenses (rows 10, 11, 13).** Once the Project is Company IP, it's the Company exploiting assets licensed to one Member personally. Confirm with Fab and Humble whether a license can move to a company the buyer owns; where it can't, buy the Company its own license for the packs the game keeps. The full Fab EULA text couldn't be retrieved for this survey (fab.com blocks automated access); read it before deciding.
4. **Yar concept (row 19).** Fill in the artist's name and the agreement date, and file the agreement with the Company's records.
5. **License copies.** Save the Cardinal license statement, the Humble/REXARD license terms, and the Fab purchase receipts (showing tier) with the Company's records. A manifest row is only as good as the document behind it.
6. **Custody (not ownership).** Transfer the NarrativeEngine repository from the CStampGames LLC GitHub org to Timeless-Way-Interactive and update the Game repo's `.gitmodules`. Also move to the Company: the `cstampsoftworks.com` domain behind Homepage and SupportContact in `Config/DefaultGame.ini`, and the itch.io channel `CstampGames/dungeon-break` in `DBPublish.bat`.

Known limitations on a Member's Section 7.3 use

Written out plainly, because this is the part a departing Member needs:

1. **The engine is not ours to give (rows 1–3).** A Member taking delivery gets the Company's own engine changes and the game; they license Unreal Engine itself from Epic under their own agreement. This is normal and affects every studio.
2. **Purchased packs stay with the purchaser (rows 10, 11, 13).** The Company's delivery includes these assets because they're in the project, but a Member may not use them in their own work without buying their own license. Rows marked Conditional are the current list.
3. **One font is not cleared for sale (row 17)** until permission is granted or the font is replaced.
4. **Cures.** Where a limitation matters to the work, the options are to buy a license in the Company's name, or to replace the asset with original or permissively licensed work. Record the choice here when it is made.
